Integrating best-in-class productivity tools with advanced security and device management

Microsoft 365 is a complete, intelligent solution that combines Office 365, Windows 10, and Enterprise Mobility + Security to empower employees to be creative and work together, securely. It integrates Microsoft's best-in-class productivity tools with advanced security and device-management capabilities to help safeguard your business.

KEY FEATURES --

Office productivity tools

Microsoft Office comes with applications to fuel your productivity. Excel lets you create spreadsheets for basic data management and analysis. PowerPoint enables you to create and present information in various formats ranging from slides to video. Word is a word-processing program to create, edit, and share documents.

Communication tools

The communication applications and services feature audio conferencing, cloud PBX phone system, Exchange business-class email client, Outlook email, and Skype for Business video conferencing and chat, Teams for live-stream meetings or calls, and Yammer for a private social network.

Cloud storage and data management and analysis

Host intranet and team websites on SharePoint. For data management and analysis, Advanced Data Governance manages the lifecycle of data, and Advanced eDiscovery analyses data in select apps. MyAnalytics tracks and analyses your work to help boost productivity, and Power BI Pro collects and sorts business intelligence data. Delve allows you to discover and organise information likely to interest you.

Security and compliance

Secure your data with a number of apps and features to protect your data, devices, apps, and network against lost or stolen devices, data leakage, malware, and other attacks and threats.

KEY BENEFITS ---

Work better together and get more done

Collaborate, share, and communicate with flexible tools that go where your team goes. Connect better with customers and colleagues with a range of communication tools, from email and IM to social networking and video conferencing. With multiparty HD video, content sharing, shared calendars, and team chat, you'll always be in sync with your team. Further increase productivity with Office apps enhanced with the latest AI tools.
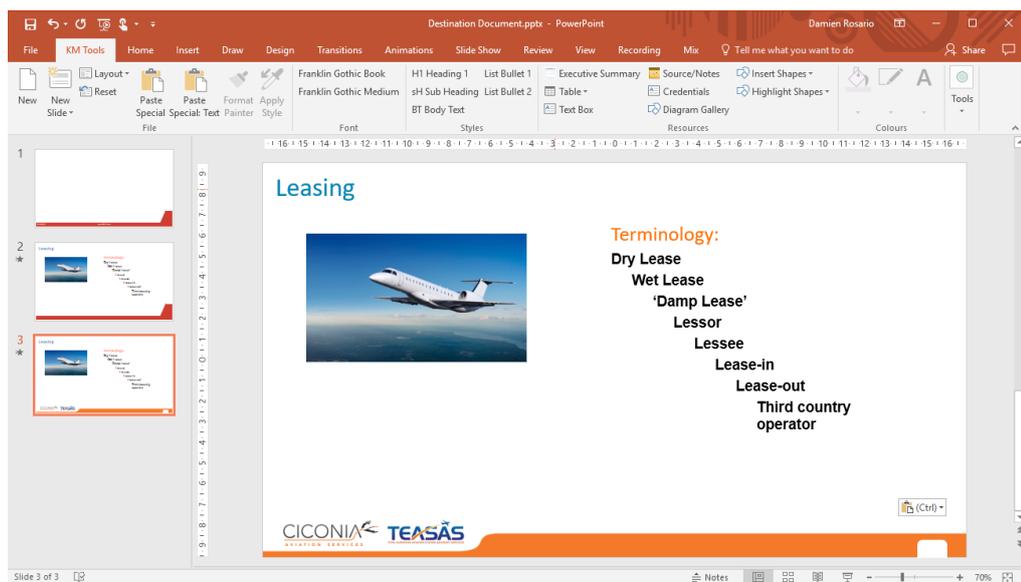

Make better decisions with intelligence and analytics

With various analytics and intelligence capabilities, Microsoft 365 gives you the insights and assistance you need to do your best work every day.

Scalability

With Microsoft 365, you pay for what you use. As your organisation grows, you simply pay for the additional services and storage needed.

More control for your IT staff

With comprehensive device and app control, your IT team will be able to customise the features and apps you use, as well as remotely manage and secure
