

Providing IT professionals with comprehensive device and app management

The Windows 10 Enterprise operating system enables you to access files and collaborate with teams from anywhere, across all your devices. At the same time, you'll get the same level of security and control used by some of the world's largest and most complex organisations in a format especially designed for small businesses. Windows 10 Enterprise provides additional security and management options to support the specialised needs of businesses that process sensitive data, operate in regulated industries with strict compliance requirements, develop software in-house, and are publicly traded or aspiring to issue an IPO. With this most secure edition of Windows, keep data, devices, and identities protected while you seamlessly run your business.

KEY FEATURES -----

Intelligent security

Advanced security features, powered by cloud intelligence, proactively protect your business against modern threats and ensure that sensitive data, identities, and devices are protected from cybersecurity threats. Employees have the freedom and flexibility to access sensitive data on a variety of devices, so you can ensure that employees see highly sensitive data only on a need-to-know basis.

Device management

Comprehensive and flexible device management is done on your terms and supports on-premises, cloud, or both.

Control for your IT staff

With comprehensive device and app control, your IT team will be able to customise the features and apps you use as well as remotely manage and secure devices.

Windows Defender Advanced Threat Protection (ATP)

ATP detects, investigates, and corrects endpoint threats, enhancing your response capabilities.

KEY BENEFITS

Partner-managed IT

We can deploy, manage, and secure your devices for you on-premises, in the cloud, or both. We'll provide comprehensive management and support related to implementation, users, subscription ordering, and configuration of services and devices.

Enhanced productivity

With an intuitive user experience, Windows 10 has built-in tools and features that help you collaborate and work efficiently.

Simplified licensing and costs

The per-user, per-month pricing and a pay-as-you-go subscription model provide the flexibility to scale as your business needs change. There are no seat minimums or limits, no device counting, and no upfront costs.

Easy deployment

Deploy easily via the cloud with 1-click configuration. You'll have maximum application compatibility with minimal cost and effort, plus simplified updates.
