

# Security for organisations with Symantec by Smart ICT

Symantec Endpoint Protection Cloud (SEP Cloud) is an easy-to-use Security as a Service that protects and manages PCs, Macs, mobile devices, and servers on various platforms from a single console, making it the ideal solution for organisations with limited IT-security resources. SEP Cloud effectively stops today's ransomware, zero-day threats, and other sophisticated attacks using advanced, multi-layered technologies, including advanced machine learning and behaviour analysis. Using SEP Cloud's default security settings and self-service device enrolment capabilities, this solution quickly protects your endpoints.

## KEY FEATURES

---

### Intelligent protection

Detect and block unknown threats with anti-malware, network security, behavioural and reputation profiling, advanced zero-day protection, and other proven intelligent protection techniques. Protect against ransomware and zeroday attacks in real time with Symantec's global intelligence across 200 million control points.

### Easy deployment and management

The management console is easy to use, and users can enrol their own devices in as little as 5 minutes.

### Modern device management

Protect mobile devices with safe mobile browsing, high-risk app detection, password protection, and remote actions such as lock, wipe, and unenrol. With support for Windows, Mac, iOS, and Android, Symantec allows organisations and employees to choose their servers, desktops, laptops, tablets, and mobile phones.

### Encryption management and more

Turn on native encryption for Apple and Windows devices, generate reports, and manage key recovery for lost and forgotten passwords. An intuitive dashboard allows you to find and quickly remediate infected devices in 3 clicks and easily bring devices into compliance. Maintain device inventory, track activities in real-time, and receive proactive alert notifications.

## KEY BENEFITS

### Strongest security network

Through the Symantec Global Intelligence Network, there's a 95% detection rate—the highest of any security vendor and with the lowest number of false positives (0.0001%).

### Cost-efficient

With the pay-as-you-go subscription model, pay for what you use, and simplify operating expenses by licensing by user, regardless of the number of devices. The solution uses your existing infrastructure and requires no additional IT staffing, resulting in more savings.

### Increased productivity

With more protection and easy management, IT workloads are reduced, and end-user productivity is increased.

### Always up-to-date

Stay ahead of threats with always-on security that is automatically updated.
